

DOWNLOAD HARGA SLIDING GATE BANDUNG

Sliding gate operators are used to drive sliding gates for residential and industrial uses. The operators can be fitted with gear wheel or chain wheel according to your needs, and featured with powerful start, capable of overworking at short time. In case of power failure, an emergency release key allows manual operation of the gate.

Advanced Features

The self-locking of immersed electromechanical gear motor keeps the gate completely closed

Safety obstruction device

Overheat & overload dual protection

Emergency release key in case of power failure

Connectable to photocells, loop detector, IC card, alarm lamp and remote controller
