

Barrier Gate Ultra Guard UK

The Ultra Guard UK Barrier Gate is a leading solution for managing vehicle traffic at modern toll gates¹. It combines adjustable open-close speed, revolutionary UHTM™ technology, and advanced security features, making it a reliable choice for enhancing efficiency and security at toll gates¹.

Here are some key features and specifications:

- **Adjustable Open-Close Speed:** With a time range between 0.9 seconds, this machine can be easily adjusted according to different traffic needs¹.
- **UHTM™ Ultra High Torque Motor:** Equipped with a UHTM™ Ultra High Torque motor, it ensures strong and smooth movement. With high torque, this motor can overcome obstacles like strong winds or heavy rain, maintaining optimal performance even in extreme conditions¹.
- **High Motor Power and Duty Cycle:** With a 150W power motor, the Ultra Guard UK barrier gate offers enough power to handle heavy workloads. It has a duty cycle of 95%, allowing continuous operation with minimal rest time¹.
- **Enhanced Security:** Ultra Guard UK has placed security as a top priority in their toll gate machine design. With advanced security features such as obstacle sensing system, excess vehicle detection, and protection against external interference, this toll gate machine is capable of protecting vehicles and users from accident risks¹.

This barrier gate is perfect for various applications such as toll gates, parking lots, office buildings, and other commercial facilities¹. It is designed to handle high traffic volume without fatigue or performance degradation¹. The Ultra

Guard UK Barrier Gate offers an unmatched user experience and unparalleled security¹.
